Nationals Abroad**

To Harness Science and Technology in Africa

Science and Technology provides the foundation for innovation and technological development, which will have a significant impact in the socio-economic development of Africa. Accelerating the capacity and capabilities of science and technology in Africa by harnessing its skills and knowledge will require collaboration, partnership and networking of all stakeholders. African nationals abroad involved in Science and Technology are one of the key stakeholders that do need to be mobilised and engaged to enable them to effectively engage in enabling the advancement of Science and Technology in Africa.

The Africa Diaspora Science and Technology project seeks to:

- Effectively mobilise and engage the African Diaspora in Science, Engineering, Technology and related sectors for projects in Africa
- Gain an in-depth understanding of the ongoing African Diaspora science and technology initiatives
- To gain an in-depth understanding of the challenges and solutions to enable effective and sustainable Diaspora engagement
- To develop a sustainable work plan to enable effective engagement

Areas of Focus included but not limited to:

- Health and Human Well-being
- Sustainable Energy
- Natural and Human-induced Hazards and Disasters
- Global Change
- Natural sciences
- Engineering
- Technology
- Research and Innovation Support and Advancement
- Astro/Space/Geo Sciences
- Biodiversity/Conservation
- Nuclear Sciences

How to get involved:
